SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures	
Inhalation	Upon breathing difficulties or irritation of the respiratory tract: Bring the person into
	fresh air and stay with him/her.
	If recovery is not rapid, seek medical attention
Skin Contact	Immediately remove contaminated clothing and shoes. Ensure that skin, which has
	been exposed to the material, is washed thoroughly with water and soap. Skin
	cleanser can be used. DO NOT use solvents or thinners.
Eye Contact	Remove contact lenses. Flush eyes immediately with plenty of water or isotonic
	water (20-30°C) for at least 5 minutes and continue until irritation stops. Make sure
	to flush under upper and lower eyelids. If irritation continues, contact a doctor.
	Continue flushing during transport.
Ingestion	Provide plenty of water for the person to drink and stay with him/her. Seek medical
	advice immediately and bring the safety data sheet or label from the product. Do not
	induce vomiting, unless recommended by the doctor. Have the victim lean forward
	with head down to avoid inhalation of- or choking on vomited material.
	If medical attention is delayed, give adults 90-120 ml hard liquor such as 40% ν/ν
	spirits. Give children proportionately less at a rate of 2ml/kg body weight.
4.2 Most important symptoms and effects	s, both acute and delayed
	The most important symptoms are described in sections 2 and 11.
	Irritation effects: This product contains substances, which may cause irritation upon
	exposure to skin, eyes or lungs. Exposure may result in an increased absorption
	potential of other hazardous substances at the area of exposure.

4.3 Indication of any immediate medical attention and special treatment needed

IF exposed or concerned:

Get immediate medical advice/attention.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media	
Suitable Extinguishing media	Alcohol-resistant foam, carbonic acid, powder, water mist.
Unsuitable extinguishing media	Waterjets should not be used, since they can spread the fire. However they may be
	used to cool adjacent containers.
5.2 Special hazards arising from the subs	stance or mixture
	Fire will result in dense smoke. Exposure to combustion products may harm your
	health. Closed containers,
	which are exposed to fire, should be cooled with water. Do not allow fire-
	extinguishing water to enter the
	sewage system and nearby surface waters.
	If the product is exposed to high temperatures, e.g. in the event of fire, dangerous
	decomposition compounds
	are produced. These are:
	Carbon oxides (CO / CO□).
5.3 Advice for firefighters	
	Wear self-contained breathing apparatus and protective clothing to prevent contact.
	Upon direct exposure contact The National Poisons Information Service (dial 111,
	24 h service) in order to obtain further advice.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

	Avoid direct contact with spilled substances.
	Avoid inhalation of vapours from spilled material.
	Prevent unnecessary personnel entering area of spillage. When cleaning up large
	spills appropriate protective clothing should be worn -see section 8.
6.2 Environmental precautions	
	Avoid discharge to lakes, streams, sewers, etc. In the event of leakage to the
	surroundings, contact local environmental authorities.
6.3 Methods and material for containmen	t and cleaning up
	Limit spillage and collect using granular absorbent or similar materials, and dispose
	of it in accordance with the regulations on dangerous waste.
	Use sand, sawdust, earth, vermiculite, diatomaceous earth to contain and collect
	non-combustible absorbent
	materials and place in container for disposal, according to local regulations.
	Wherever possible cleaning should be performed with normal cleaning agents.
	Avoid use of solvents.
6.4 Reference to other sections	
	See Also Section 8, 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling	
	Avoid any method of handling that generates mists or aerosols.
	Do not eat, drink or smoke when handling this product.
	See section on 'Exposure controls/personal protection' for information on personal
	protection.
7.2 Conditions for safe storage, including	any incompatibilities
	Always store in containers of the same material as the original container.
	Containers that have been opened must be carefully resealed and kept upright to
	prevent leakage.
Storage temperature	Room temperature 15 to 30°C
Storage life	Stable under normal conditions.
Incompatible materials	None known.
7.3 Specific end use(s)
